

Asp.Net - Required Field Validator

ASP Source:

```
<html>
<body>

<form runat="server">
Name: <asp:TextBox id="name" runat="server" />
<br />
Age: <asp:TextBox id="age" runat="server" />
<br /><br />
<asp:Button runat="server" Text="Submit" />
<br /><br />
<asp:RequiredFieldValidator
ControlToValidate="name"
Text="The name field is required!"
runat="server" />
</form>

</body>
</html>
```

Output Result :

The screenshot shows the rendered HTML form. It contains two text input fields: one labeled "Name:" and another labeled "Age:". Below these fields is a button labeled "Submit". The form is styled with a simple border and a light background.
