## Pop-Up Windows

**Use the Dreamweaver behaviors panel to create small pop-up windows for ads or news!**

This behavior helps to create pop-up ads, small browser windows etc. If you don't have Dreamweaver we have provided the code that you can cut 'n' paste and use in your web page.

### 'Open Browser Window' Behavior

This behavior allows you to open a browser window in any size you specify. e.g.

**Code for the Function:** Cut 'n' Paste Code

```
<script language="JavaScript" type="text/javascript">
<!--
function MM_openBrWindow(theURL,winName,features) { //v2.0
window.open(theURL,winName,features);
}
//-->
</script>
```

**Code for the Links:** Cut 'n' Paste Code

```
<a href="javascript:;"
onclick="MM_openBrWindow('/website_templates/n/business1/preview.htm',
'template', 'width=780,height=550')">Click Here </a>
```
